

It just fits for usual life

810s  
[eit-tens]  
エイトテンス

810s is an abbreviation of eight tenths which means 80%.  
It may express a state just appropriate for a person  
which is neither excessive nor insufficient.  
It is a term used for quantity and size.  
It will be used for shoes too down the road.

Fall-Winter 2026

 **MOONSTAR**

MADE IN KURUME

26FW

## MOONSTAR

MoonStar Company has been producing shoes in Kurume (which is a city located in Kyusyu, Japan). Kurume first prospered in the rubber industry manufacturing Jika-Tabi\*shoes. We apply the technology and experience we have gained through our long history to every shoe we make. Since 1873, we have devoted ourselves to making comfortable shoes for everyone.

\*Jika-Tabi A rubber-soled boots with a unique split toe

## FINE VULCANIZED

Vulcanization is a process that is done in very few factories around the world. Vulcanized shoes are durable, have a flexible sole and can maintain its shape. The fine quality that comes from this process can only be achieved by the hands of a skilled craftsman. We will keep producing "MADE IN KURUME" shoes with pride and confidence.

## Manufacturing

### CUTTING

The comfort changes just by the way it is cut. We pay extra attention and cut the materials considering the materials' features and efficiency.

### SEWING

High sewing techniques are required to build up a three-dimensional shoe with a perfect fit from a piece of cloth. The comfort of our shoe is supported by our skillful craftsmen.

### ASSEMBLING

Raw rubber is as soft as clay and very delicate. Therefore, exquisite adjustment of power is necessary in this process. This is the reason why each shoe is still made by hand.

### VULCANIZING

The shoe is placed in a kiln and vulcanized with heat and pressure. The heat causes a scientific reaction to the raw rubber and sulfur (added in the kneading process) which creates a flexible and elastic shoe.

日々にちょうどいいフットウェア  
Just the right footwear for every day

810s[eight-tenths]

From the professional use to the daily use.

810s is a product-line that proposes as a just-right-daily-tool based on a shoemaking know-how cultivated in specialized fields.

810s means "Not full, but not unsatisfactory" and is derived from the Japanese word for the eight-tenths of a stomach = 8/10 eight-tenths.
